

ICES Advice components

Products

- Annual recurrent advice on 200-250 fishing opportunities
- Special requests on broader ecosystem considerations, methodological standards and threshold values: ecosystem and fisheries overviews, vulnerable marine ecosystems, indicator development for healthy seas, evaluation of management plans
- Technical advice and international peer review
- Data used in science and advisory products
- Science highlights within areas of societal importance
- Identification of research needs
- Training
- Publications

State of fish and shellfish stocks and advice on catch opportunities

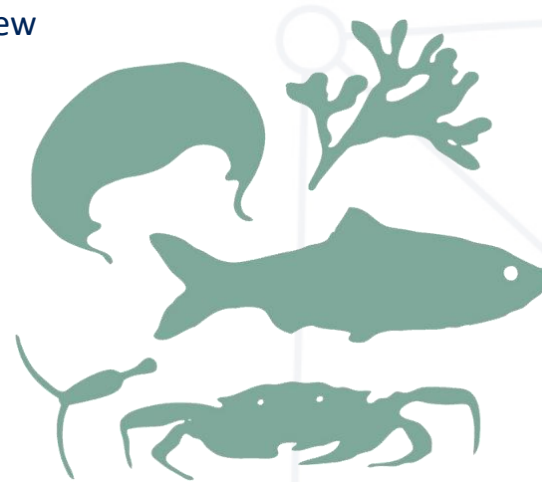

Catch Opportunities

Fisheries Overviews

Who, what, where and impacts
Mixed fisheries advice

Ecosystem Overviews

Consideration of activities, priority pressures and consequences on on ecosystem state, structure and function

ICES Advice communication

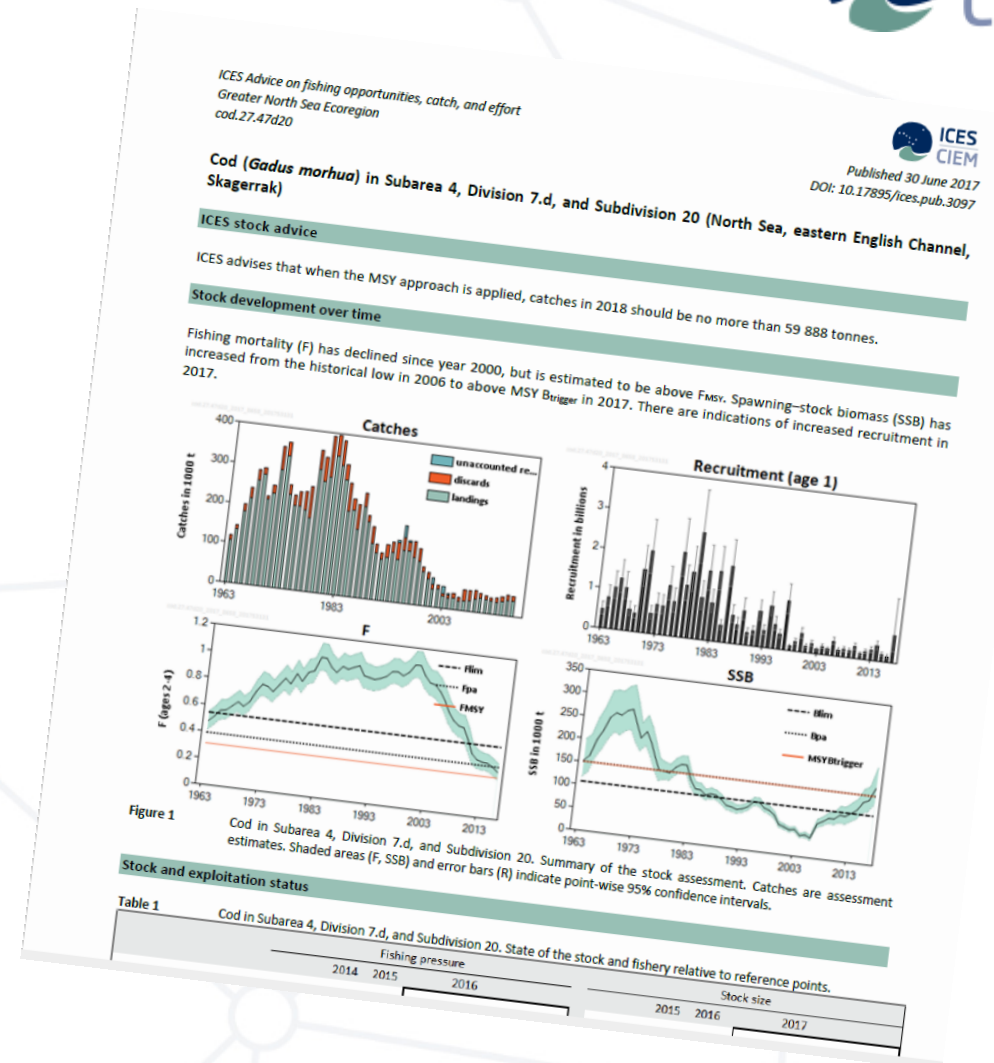

AC Meetings, Clients, etc.

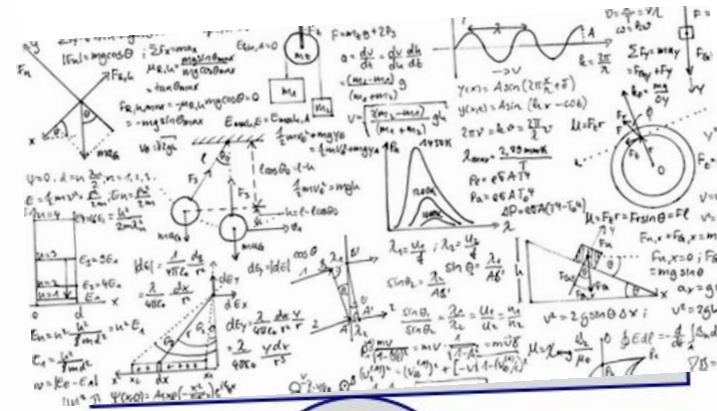

ACOM Chair, ViceChairs and Head of advice have an annual tour presenting ICES advice on Fishery opportunities

Presentation includes:

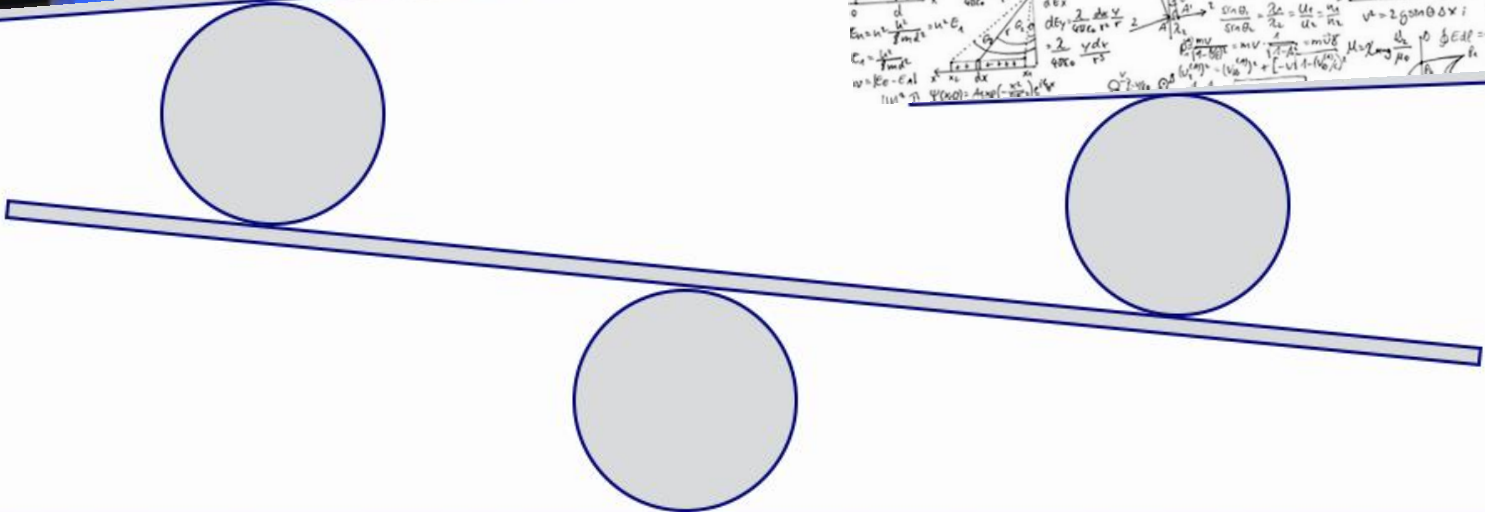

- Changes from last year
- Issues relevant for advice
- Particular wishes if any
- Usually around 100 slides...

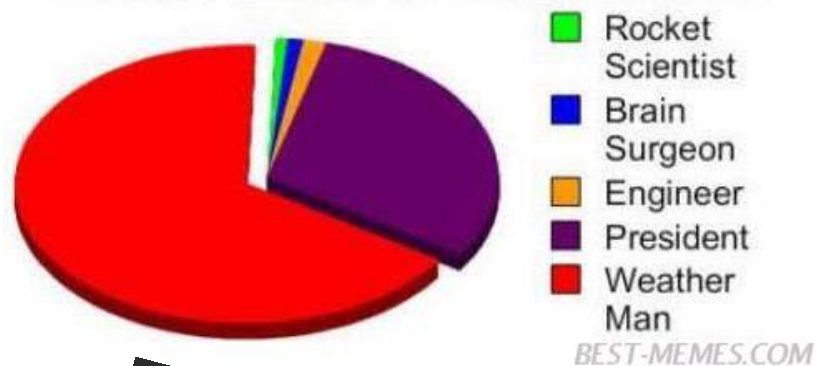

As simple as possible and as complicated as necessary

Explaining complex stock assessment including uncertainty while minimizing confusion

**Chance of keeping your job if you're
WRONG more than 75% of the time**

So any ideas?

TAF!

Step-by-step guidance to advice sheets?

New and improved formulation of single-stock advice? How?

Interactive presentation of advice?

Decision tables?

...?
